

Regarding RM-10620 Novice - Advanced auto upgrade

SENIOR amateurs with at least 40 or 50 years of amateur community service should also be allowed to AUTOMATICALLY UPGRADE (General to the higher grade).

Why just limit the auto upgrade to Novice and Advanced holders? General Class holders should have equal privileges especially with their experience and longevity (age and service). Most in this age group have continuous community service.

My own experience (Robert B. Street W4IET) of 61 years with the same license, same call (W4IET) since 1941. My age is 79 and still active in local community net. I also hold FCC General Radiotelephone and have held Radiotelegraph licenses since 1941-42.

Please consider this comment because as several articles regarding age and service upgrade have been published during the past several years.

Thanks

Robert Street W4IET
